

The BRIDGE Method — Shared Behaviour Plan

A working document for parents and teachers to complete together

Child's name:		Date started:	
Parent(s):		Teacher(s):	

B — Behaviour has a Reason

What is this behaviour communicating? Complete separately, then compare notes.

	Parent observation	Teacher observation
Behaviour we're seeing		
What tends to happen right before?		
Likely function (circle one)	Attention / Escape / Access / Sensory	Attention / Escape / Access / Sensory

R — Record the Pattern

Log a few real moments over 1–2 weeks. Use the same format at home and school.

Date / Setting	Antecedent (what happened before)	Behaviour (what happened)	Consequence (what happened after)

I — Identify One Shared Goal

Bring your honest priority. Find the overlap, or agree on the one that matters most right now.

What's hardest at home right now?	What's hardest at school right now?
Our shared goal (one target behaviour, in plain language):	

--

D — Design Matching Strategies

One approach, adapted for each setting. It should feel recognisably the same to the child.

Replacement behaviour we're teaching:	
How this looks at home	How this looks at school

G — Give Consistent Language

The same phrases, used in both places, so the child hears one message.

Situation	What we'll say
Naming the feeling	
Offering a choice	
Asking for a break	

E — Evaluate & Adjust Together

A short, recurring check-in. Doesn't need to be long, just regular.

Check-in date	What worked	What didn't	Adjustment for next time

Suggested check-in cadence: weekly for the first month, then fortnightly.
